

# Duck Creek + Agencyport

## Serving Up The Elegant Digital Experience Your Customers Now Expect

Duck Creek Technologies' Policy solution is as good as it gets when it comes to policy administration. Underwriters, actuaries, product designers, and managers at insurance companies all over the world can attest to it. Wouldn't it be great if you could leverage this core investment to do great things for your agents, too? With pre-integration of Policy and AgencyPortal®, now you can .

Agencyport's Duck Creek Integration Kit pre-integrates our AgencyPortal® front end and Duck Creek's Policy, letting you use your policy administration system for what it's best at and your agent portal for its specialty. Pre-integration reduces implementation costs and eliminates the hassles that come with dual maintenance and the risk that comes with first-time integration.

### With the Duck Creek Integration Kit, AgencyPortal® and Duck Creek Policy are pre-integrated for:

- Customer Account Management
- Risk Clearance & Market Reservation
- Premium Calculation
- Elements of Product Definition Including:
  - Custom Underwriting Questions
  - Industry Codes
  - Class Codes
  - Producer Codes
  - Coverages
  - Limits
  - Deductibles

### Uninterrupted agent productivity... despite the chaos

Duck Creek Not Up and Running Yet?

Policy administration implementation projects are complex and often span years. Conversion, migration, testing... they represent real business impact and carry real business risk. It's no wonder these projects are likened to swapping out a jet engine in mid-flight. AgencyPortal® allows your agents to keep moving, unaffected by (in fact, *unaware* of) what's happening behind your PAS walls.

As Duck Creek comes online, the Kit will manage the process of sending things to the right place.\*

Yes, policy system migration is hard. But it doesn't have to be for your agents.

*\* For lines of business or states not yet available in Duck Creek, data can be staged or integrated elsewhere or a manual process triggered behind the scenes.*
