

Launch Faster. Underwrite Smarter. Grow Stronger.

The leading P&C insurance policy administration system built for profitable underwriting, product speed and global scale. Powered by an agentic platform that applies intelligence where it matters and governance when it must.

With low-code tools, reusable product templates, integrated bureau data, and evergreen SaaS delivery, Duck Creek Policy helps insurers from configuration and underwriting to issuance, servicing, and compliance without the cost and disruption of other core systems.

Bringing home the gold for our customers
Duck Creek is recognized as an industry leader and trusted by 75% of the world's largest global insurers.

Common Challenges

How Duck Creek Policy Moves You Forward

<p>Manual underwriting drag </p> <p>Underwriters waste time on routine submissions, limiting focus on complex risk and reducing pricing consistency.</p>	<p>Automate the routine </p> <p>Embed intelligence into workflows so underwriters can focus on risk quality, margin, and consistency.</p>
<p>Product cycles drag on for month </p> <p>Opportunities pass while teams wait on configuration, testing, and deployment.</p>	<p>Accelerate change safely </p> <p>Enable faster product and pricing updates with flexible configuration and controlled automation.</p>
<p>User experiences feel disconnected </p> <p>Siloed systems create friction across underwriting, distribution, and service experiences.</p>	<p>Deliver connected experience </p> <p>Unify persona-driven workflows, shared product definitions, and in-context guidance across the suite with a global inheritance model.</p>

Turn your product vision into lasting market impact.

Built for Real-World Insurance Demands

FEATURES

Prebuilt Commercial Lines Content

ISO, NCCI, AAIS, and 12K+ supported forms.

Low Code Product Configuration

Built-in rating, price optimization, and experimentation tools.

Omnichannel Support

A single product definition powers agency, digital, and embedded experiences.

Agentic Decisioning

AI recommendations, rules, audit trails and explainability.

Integrated Ecosystem

API-first architecture and on-demand integrations.

Why Carriers Win with Duck Creek

● Product agility without rebuilding the core

Launch and update products faster with low-code/no-code configuration, configurable inheritance, and prebuilt bureau content. Without disrupting the core or overloading IT.

● Insurance-specific inheritance built to scale

One core foundation through a global inheritance model, enabling expansion across regions, lines, and operating models. Without multiplying instances or separate solutions.

● End-to-end policy lifecycle with persona-based workspaces

Full lifecycle support—from quote to issuance, endorsement, renewal, cancellation, and rewrite—with role-based experiences. Without adding complexity or separate systems.

● Extensive ecosystem connectivity

API-rich platform with 2,000+ APIs and extension points, and managed prebuilt integrations, supports underwriting, rating, workflow, and digital experience.

● Embedded intelligence across the suite

Integrated across the full suite and powered Agentic Intelligence for smarter decisions, automated workflows, stronger compliance, and profitable growth.

Proven in the Market

GAINSCO

Selected Duck Creek for its highly configurable, low-code approach and Microsoft-based architecture.

FCCI INSURANCE GROUP

Exceeded premium projections by 30% within six months.

"We knew we had to do something different and that it was time for an upgrade, which is how we ended up connecting with Duck Creek Technologies."
