

# Accelerate Producer Productivity at Scale

Duck Creek Producer Portal is a modern digital engagement portal that helps carriers simplify how independent agents and brokers do business.

By combining intuitive workflows, ACORD based standards, system agnostic integration, and a single point of change with Duck Creek Policy, it enables faster submissions and lower servicing costs. This drives stronger producer loyalty while helping carriers expand distribution with speed.

## Common Producer Challenges

### Too hard to do business

Fragmented portals and manual processes slow submissions, frustrate producers, and push business toward easier carrier relationships.

### Slow distribution response

Disconnected workflows and inefficient intake delay quotes and decisions, reducing competitiveness and market responsiveness.

### High cost to maintain

Separate portals, duplicate updates, and custom coding increase IT burden and slow innovation across distribution channels.

## How Duck Creek Producer Portal Moves You Forward

### Unified producer experience

A modern self-service portal streamlines submissions, improves usability, and makes it easy to partner with your organization.

### Faster submission to quote

ACORD-based workflows, prefill, and downstream processing reduce friction and accelerate producer and underwriting response times.

### Single point of change

Shared definitions, workflows, and low-code tools reduce maintenance effort and speed updates across systems.

Turn producer efficiency into scalable growth.

# Built for Frictionless Producer-carrier Execution at Scale

## FEATURES

### ACORD-Based Intake

Accelerate submissions with familiar standards, digitized forms, and cleaner data.

### Increase Producer Satisfaction and Productivity

Deliver intuitive self-service workflows that increase producer satisfaction and adoption.

### System-Agnostic Integration

Connect agency systems, raters, and core platforms for seamless workflow continuity.

### Low-Code Configuration

Enable faster business changes without lengthy custom development or IT bottlenecks.

### Single Point of Change

Align portal updates with product definitions to simplify maintenance and control.

## Why Carriers Win with Duck Creek

### ● Accelerate Distribution Growth

Support meaningful distribution expansion by making it easier for producers to submit and place more business.

### ● Streamline Submission Work

Reduce administrative effort and accelerate throughput with digital workflows and automated intake capabilities.

### ● Scale Submission Intake

Handle producer submissions at scale using standardized intake and transformation for downstream processing.

### ● Eliminate Repetitive Entry

Eliminate repetitive data entry through automated forms processing and prefill integrations across workflows.

### ● Exceed Producer Expectations

Meet clear market expectations for faster, easier producer engagement directly within existing workflows.

## Proven in the Market

Includes prebuilt integrations with major agency management systems, comparative raters, and digital agents, as well as integrations to technology providers who specialize in solving unique agent and broker use cases, including:
