

InvoiceCloud + Duck Creek Technologies

Transforming the Insurance Payment Experience, Together

One connected system. From policy bind to final disbursement with no gaps, no manual handoffs, and no reconciliation debt.

Duck Creek manages the policy lifecycle. InvoiceCloud owns the payment moment. Together they close the loop.

Three Reasons Carriers Choose This Partnership

A Certified Integration That Survives Upgrades

InvoiceCloud's certified, upgrade-safe integration lives inside the Duck Creek Payments Marketplace so both platforms advance independently without creating downstream risk for each other.

A Payment Experience Built for Insurance Policyholders

Built for insurance from the ground up, InvoiceCloud unifies inbound premiums and outbound disbursements under one contract while delivering the payment channels carriers need and the adoption results they want, with an average 49% increase in digital payment adoption and 58% growth in paperless enrollment within 12 months.

Operational Relief Finance and IT Teams Can Measure

InvoiceCloud delivers a 99% automated reconciliation match rate, AI-generated reports that eliminate manual ticket queues, and compliance-ready audit trails built to satisfy 50-state DOI requirements giving billing and finance teams back the hours they were spending on exceptions, matching, and report requests.

The Duck Creek and InvoiceCloud integration covers the full arc of the insurance payment lifecycle from the first premium collected on a new policy through every disbursement issued on a closed claim.
