

Paymentus

Intelligent Interactions. Simplified Payments.

**Insurance Disbursements to
Support the Full Claims Ecosystem**

Unrivalled Disbursements Speed & Payout Choice When It Matters Most

Improve operational performance, strengthen loyalty, and cut costs with Paymentus. The Paymentus insurance solution enables insurers to offer flexible payout options and accelerate disbursement speed, all while reducing escheatment and fraud.

Expansive Digital Claims Payout Options

Deliver payouts with funding options that include ACH and debit cards, digital wallets (PayPal, Venmo, Apple Pay®, and Google Pay™), Real-Time Payments® (RTP), FedNow®, eChecks, wire transfers, and traditional check, print, and mail options. Keep claimants connected to their claims payout status via automated SMS (text) and email notifications.

Dynamic Risk Management Tools

Reduce fraud with a full suite of authentication and authorization tools designed to seamlessly safeguard insurers and their claimants without adding friction to the disbursement process. Fraud management capabilities are built to support real-time payments in adherence with Insurance-Specific PII & NAIC Compliance standards.

Simplified Multiparty Disbursements

Enable multiparty check management under a single claim, with dual-signatory authorization approval and multiparty authorizations for greater security and control.

Robust Vendor Network with Convenient Pre-Registration

Simplify the outbound payment process by enabling vendors to pre-register with insurance carriers within Paymentus' vast vendor network. Insurers can access more than one million entities through the Paymentus Vendor Portal. By providing and securely validating their account information to register and store tax documents, vendors are set up to provide fast, direct disbursements and payouts when the time comes, improving the policyholder experience.
