

Utilant's Loss Control 360 is the "best-in-class" Loss Control Survey Management Platform for Global P&C and top risk engineering companies, establishing a hub connecting insurance core systems, inspection firms, and InsurTechs to provide automation to identify, manage and reduce risks.

Explore Loss Control 360's Workflow Engine, Modules and Ecosystem

Self Survey

Reduce inspection cost and promote policy holder engagement by allowing insureds to survey their own homes by using our intuitive and easy to use web application.

No app to download!

Client Location Manager

Allow your loss control team to manage large commercial lines accounts, with multiple locations, as a single unit. Create service plans, schedule multiple inspections and more.

Impairment Tracking

Give customers the ability to submit impairment notices for portions of their work sites through Loss Control 360's Client Portal module.

RapidSketch

RapidSketch is a diagramming tool used to quickly and easily draw the floor plans of residential and commercial properties.

Can instantly calculate square footage and is fully integrated with Loss Control 360.

Pump Flow Test

Facilitates the controlled testing of fire pumps to ensure proper pressure, which can be used for NFPA 20/25 compliance.

Premium Audit

Best in class functionality for Workers Comp and GL to confirm current premiums with policyholders, ensuring the right amount of policy coverage.

Most robust and configurable rules engine on the market for policy audit identification and determination of audit type required.

Client Portal

Enables interactive experiences with clients by allowing access to account and location specific data and simplifying the process of recommendation follow through.

Tableau Reporting

Give your executive team and supervisors powerful insights to risk exposures and trends through eye-catching data visualizations and reports.
